**Note re Pricing:** Country Association's report detailed information about crops and varieties at the IBA Annual Conferences. Due to very strict UK competition laws, historical prices and price expectations are not discussed in 2016. Information on historical pricing may be collated and made available on a new password-access section of the IBA website as from 2017 onwards.

**IMPORTANT:** The above figures are collated from estimates provided by country representatives. In some instances they are projections and should not be taken as absolutes. For many reasons, actual production can vary from the figures shown and the International Blackcurrant Association can't accept any responsibility for the accuracy of them: they should be treated as estimates provided in good faith but not necessarily correct.

**POLISH CROP 2014:** Dramatic weather conditions throughout season in many parts of Poland meant the total 2014 crop could be between 20 and 40% less than 2013.
